

## **ADAM JACOB MANICK**

---

*The Baby Formerly Known as "Mungus"*

5421 Noble Ave.  
Sherman Oaks, CA 91411

**Born: July 10, 1996 6:10 P.M.**

**Vitals: 7 lbs. 12 oz. 19 3/4 in.**

### **Goals**

Nine months of intense development and personal growth as an "insider" in a fast-growing environment has prepared me for new experiences on the outside. Now in a more visible position, I plan to take on new roles to enable me to develop to my full potential. My accomplishments are well-recorded and seem to generate attention and awe. As an effective speaker, my orations usually result in the undivided attention and prompt action of those near me.

### **Experience**

#### **THE STEVE AND DARLENE MANICK COMPANY, SHERMAN OAKS, CA**

7/96 to Present **Baby (Post Umbilical)**

- Responsible for the domestic scheduling of all full-time staff, including the determination of sleep cycles, meal times, recreation, sanitation and hygiene, and family and social activities.
- Experienced in the production and distribution of natural gas and related end-products.
- Instrumental in training individuals in areas of responsibility, long-term commitment, and family values.
- Responsible for the external production and regulation of dairy products. Not one to believe in easy formulas, I keep abreast of milk distribution with an effective hands-on approach.
- Responsible for much-needed tax deduction for parent company. Also provide incentives for long-term financial and educational planning.
- Some delivery experience.

#### **THE STEVE AND DARLENE MANICK COMPANY, SHERMAN OAKS, CA**

10/95 to 7/96 **Embryo/Fetus (Internal Position)**

- Existence was conceived as the result of a friendly merger of two parent companies. A long courtship and intense negotiations resulted in an entry-level position.
- Responsible for the rapid development and expansion of parent company. Parent company is currently downsizing as a result of offshoot going public.
- Instrumental in the establishment of a secure environment which included housing, nutrition, shared resources and a comfortable atmosphere.
- Finding myself too confined in my environment, I contracted my way to a more visible position, and after hard labor, found myself greeted with open arms and was soon pampered and embraced.
